

CARTA DE COLORES / PALETTE OF COLOURS / PALETTE DE COULEURS

COLORES

En Demosaica ofrecemos a nuestros clientes una amplia gama de colores, desarrollada en base a años de experiencia y al trabajo artesano. Gamas que van de pasteles en tierras, azules o verdes y amplias paletas de blancos, beige y oscuros intensos. Todo para que usted pueda diseñar sus soleras con los diseños y colores más de moda.

Con nuestra aplicación de diseño, usted podrá combinar todos nuestros modelos con los colores que desee.

Debido a su carácter artesanal, el tono de los colores podrá tener ligeras variaciones.

COLOURS

In Demosaica we offer a wide range of colours, based on our years of experience and on the artisan handicraft. The actual trend regarding the colours is employing striking tonalities, nude ranges, blues or greens and a wide variety of whites, beiges or intense dark colours. All of them are made for you to design your own flooring with the most trendy colours and designs.

With our design tool, you will be able to design and combine all our models with the colours you desire.

Due to its handicraft nature, tiles can show a slight variation in tone.

COULEURS

Demosica vous offre une large gamme de couleurs qui est basée sur nos années d'expérience et le travail artisanal. La tendance actuelle en termes de couleurs, montre aujourd'hui des teintes frappantes. Une gamme qui comprend de couleurs pastel, les bleus et la palette de vert le blanc, beiges ou des intenses couleurs foncées. Toutes les couleurs sont combinées avec tous nos modèles de carreaux ciment pour créer une infinie variété de carrelage.

Vous pourrez concevoir tous nos modèles en combinant les couleurs comme vous désirez avec l'application que vous trouverez dans notre site web.

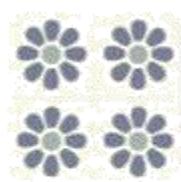

À cause de son caractère artisanal les carreaux peuvent présenter une légère variation de tonalité.

MODELOS

Aquí usted encontrará una pequeña selección de nuestras baldosas. Son propuestas que reinterpretan los antiguos suelos hidráulicos, como los círculos, las líneas, las estrellas, las flores o los rombos, pero con más sencillez y simplicidad dando un toque más modernista y actual.

Podemos realizar cualquier diseño de pavimento hidráulico en cualquier color. Usted puede pedirnos otro diseño o incluso entregamos el suyo para traducirlo técnicamente para el proceso de producción.

Por supuesto las baldosas también pueden ser monocromáticas. Si quiere que le hagamos cualquier otro diseño o muestra, contáctenos.

MODELS

Here you can find a small collection of our tiles. They are proposals which reinterpret the ancient encaustic tiles, such as circles, lines, stars, flowers or diamonds, but more simplicity in order to give a more modern and current image.

We can make any design of hydraulic floor in any colour. You can ask for other design or even bring us your own design; we will be able to adapt it technically for the production process.

Of course the tiles can also be monochromatic. We are able to make you a test of any other design of hydraulic floor; in case it suits you please do not hesitate to contact us.

MODÈLES

Ici vous trouverez une petite sélection de nos carreaux. Ils représentent les carreaux de ciment antiques, comme les cercles, lignes, des étoiles, des fleurs ou des diamants, mais avec plus de simplicité pour donner une image plus moderne et actuelle.

Nous pouvons faire n'importe quelle conception du plancher hydraulique dans n'importe quelle couleur. Vous pouvez demander à la conception d'autres ou même renoncer à son pour traduire le plan technique pour le processus de production.

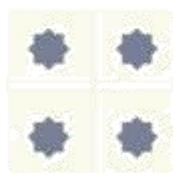

Bien sûr, les carreaux peuvent aussi être monochromatiques. Si vous souhaitez nous charger de tests de tous les autres soles hydrauliques ou des échantillons s'il vous plaît contactez-nous.

PROCESO DE ELABORACIÓN

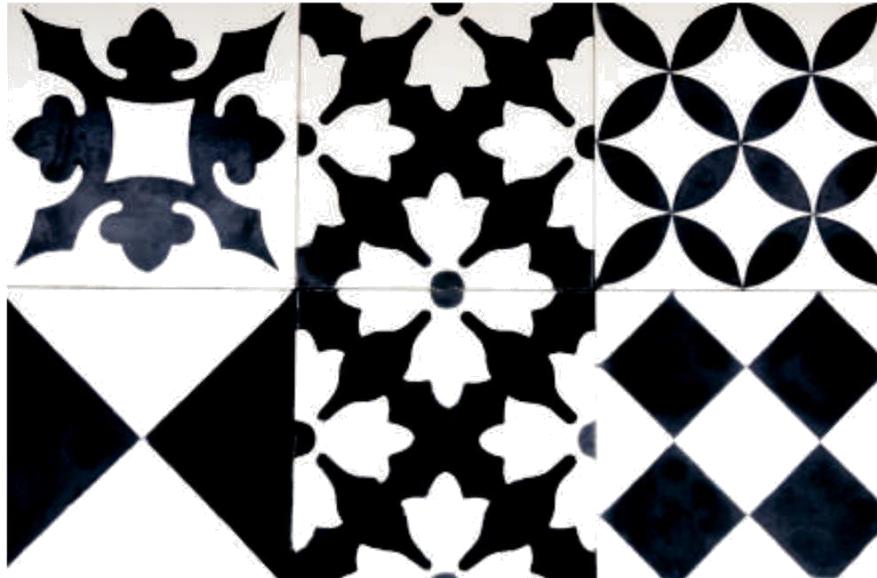

Todos nuestros productos se fabrican artesanalmente, pieza a pieza con herramientas y útiles antiguos, y con un control de calidad exigente, eligiendo los colores a emplear y preparando una pasta en la que se mezcla polvo de mármol blanco, cemento blanco, arenilla y pigmentos de primera calidad. Este preparado va a un molde llamado trepa. Cuando la trepa se ha llenado por completo, se coloca bajo una prensa hidráulica (de ahí su nombre) que la comprime.

MAKING PROCESS

All our tiles are handmade, one by one using traditional tools and under a very demanding quality control. Once the colours to be used are chosen, a paste is made with the white marble dust, white cement, grit and high quality pigments. This preparation goes into a plaster cast which includes a brass standoffs embedded in a frame; where the mixture is pour over. Each space is filled with a colour.

PROCESSUS

Tous nos carreaux sont fait à la main, pièce à pièce, en utilisant des outils traditionnels et avec un control de qualité très exigeant. Une fois les couleurs sont choisis, on prépare une pâte qui est mélangée avec la poudre de marbre blanc, du ciment blanc, du sable et des pigments de haute qualité. Cette préparation entre dans un moule, qui comprend un corps en laiton espacé et intégré dans un cadre, sur lequel le mélange est versé.

LIMPIEZA Y MANTENIMIENTO

Las baldosas hidráulicas se tratan después de la colocación para protegerlas contra las manchas e impermeabilizarlas al agua; y para darle brillo o pátina, resaltando los colores.

Habrá siempre que aplicar los tratamientos en un suelo muy seco, ya que si hubiera humedad, ésta se quedaría bloqueada debajo de la impermeabilización, dando lugar a manchas de humedad.

Nunca aplicar productos ácidos o lejía. Los posibles tratamientos serán con productos impermeabilizantes, de encerado o cristalizado.

MAINTENANCE

Encaustic tiles need to be sealed after their laying in order to protect them against marks, waterproof them and give them a shiny ending, showing up the colors.

Sealing products must be applied in a very dry floor, because in case of humidity, this could stay under the tiles and the waterproofing product, causing marks.

Do not use acid products or bleach. The only sealing products must be waterproofing, waxing or crystallizing products.

ENTRETIEN

Les carreaux de ciment doivent être traités après la pose pour les protéger des tâches en les imperméabilisant et en les donnant une finition brillante qui surélève la couleur.

Les produits imperméabilisants doivent être appliqués quand les carreaux sont complètement secs, car l'humidité pourrait rester sous les carreaux en donnant lieu à l'apparition de tâches.

Il ne faut pas utiliser de produits acides ou de l'eau de Javel. Les produits d'entretien possibles seront que des produits imperméabilisants, de cirage ou produits de cristallisation.
