

# DETTILES

handmade ceramic mosaics

# THIS IS MORE THAN JUST A TILE

We are glad to share the delight and pleasure from the things we do at DETILES studio. Each time when a new design is created or the testing of new color is done, we are pleasantly surprised by the result, and are always excited to understand the endless possibilities as to our projects.

Initially, we wanted to create a tool that would enable designers and architects to implement their ideas into ceramic wall decoration. We have now selected tile designs that could be used by customers without any special preparations, by simply choosing the mosaic from our catalogue which would fit a buyer's taste. Such elements are easy to install and the specified dimensions will help while selecting the pattern that will suit a project.

---

Aesthetic enjoyment of our customers is a priceless feeling for us.  
We truly wish to make your interior unique and special.

This mosaic has a relief surface. Glossy tiles gently reflect the light and matte tiles look like they've been sprinkled with a sugar powder.

# GENERAL INFORMATION

---

In this catalog, we show the tile designs that can decorate your home with unique taste. We are also glad to create individual projects and are open minded for collaboration with designers and architects. We continue evolving in order to please the growing demand for new mosaic ideas.

## Symbol meanings:

- 🌐 - Wall;
- ☼ - Suitable for outdoor decoration;
- 💧 - Suitable for decorating the walls in areas with high humidity and wet areas;
- 🚿 - Wet floor areas;
- 🏠 - Floor;
- 🔥 - Heated floor.

## General recommendation:

It is recommended to choose tiles with a matte surface, when using mosaic tile as flooring, especially in wet areas. We do not recommend using texture or 3D tiles for flooring. Not recommended for use as a floor covering in public areas.

## General characteristics of mosaics:

All of the dimensions are placed on the end points of the elements that shown in the picture. The colors in the catalog and on the website may differ from the actual color, as the printing and display monitor can distort colors. Since these are handmade products, the size and shape of the products may have slight variations. Some of the glazes may have light cracks on the surface. Please note that the glaze may slightly differ depending on the batch. Also, minor differences can be due to the manual production, depending on the layer of the glaze that is being used for the production of your batch.

## Packing:

Mosaics are packed into a standard packaging. Each package contains from 3 to 10 pieces of sets that are shown in this catalog.

## Recommendation for installation:

For an ease of installation, tiles are glued on the back of the grid. Products are mounted with the tile adhesive on the basis of standard tiles. Joints, if desired, are filled with grout. We insist on applying the grout when the tiles are used in a humid environment and for outdoor facing, so they do not fall off and the joints are not bred with bacteria.

## How to order:

Please contact our distributor in your country to purchase our products or to place a specific order. If there are no distributors available in your region, please contact us by e-mail.
